

Alexander Rose

Founder of The Interval (<http://theinterval.org/>), Executive Director of The Long Now Foundation (<http://longnow.org/>)

(<https://twitter.com/zander>)

Alexander was hired in 01997 to build the 10,000 Year Clock with computer scientist Danny Hillis. Alexander speaks about the work of The Long Now Foundation all over the world at events ranging from the TED conference to NASA. He was an artist in residence at Silicon Graphics Inc., and a founding partner of the robotics company Inertia Labs. As the director of Long Now, Alexander has facilitated projects such as the 10,000 Year Clock, The Interval, The Rosetta Project, Long Bets, Seminars About Long Term Thinking, Long Server and others. Alexander shares several design patents on the 10,000 Year Clock with Danny Hillis, the first prototype of which is in the Science Museum of London, and the monument scale version is now under construction in West Texas.
